

Generation Four (GEN4) Public Release Notes

AutumnTECH's GEN4 release is considered a major upgrade. The following bullet list represents the major software versions that have changed from the Generation Three (GEN3) environment. GEN3 will continue to be supported by firmware upgrades and technical assistance until midnight, December 31, 2009. Quarterly Update and Support plans will continue unchanged between major versions.

- OpenBSD Operating System v4.1 → v4.4
- Postfix E-mail Server v2.4.3 → v2.5.3
- Spamassassin Anti-Spam Server v3.2.0 → v3.2.4
- ClamAV Anti-Virus Server v 0.94.2 → 0.94.2 (no change when 4.0.1 patch is applied)
- MySQL Database Server v5.0.37 → v5.0.51
- Squid Web Proxy Engine v2.6 STABLE12 → v2.7 STABLE3
- Snort Intrusion Detection Engine v2.6.0.2 → v2.8.0.1
- Postgrey Greylisting Engine (not installed in GEN3) → v1.31
- Webtility Web-Administrator v3 → v4
- AutumnTECH Idafilter Messaging Delivery Agent v3 → v4

The complete guide for upgrading to GEN4 can be found online at:
